

Company Member Spotlight

Star Harbor Space Academy

STAR HARBOR will be the world's first publicly accessible spaceflight training facility and cutting-edge research and development campus for emerging technologies. The 53-acre mixed-use STAR HARBOR campus and training center will be located south of Denver in Lone Tree, Colorado (Douglas County) and will welcome the public, students, trainees, researchers, government, military, industry, and entrepreneurs alike.

Maraia Tanner, CEO

Our Mission.

Our mission is to cultivate a sustainable and thriving future for all those on and off the planet. We believe the minds and technologies that solve our challenges in space will help to solve many of our most pressing challenges on Earth. This is why we are creating affordable public access to the critical infrastructure and testing environments necessary for human spaceflight training and the rapid development of impactful technologies.

Key Academy features will include:

- Aircraft for parabolic flight
- High-gravity human centrifuge
- 4-million+ gallon neutral buoyancy tank
- Hypobaric and hyperbaric chambers
- Supporting facilities and equipment
